

GRANT FORCE

Helping mission-led organisations grow their impact

What we believe

The organisations tackling society's hardest problems deserve the best technology in the world working for them. We exist to make that true.

Your best work is human — relational, specialised, the kind no technology can replace, nor should it. But too much of the sector's time is lost to the repetitive and the administrative, pulling brilliant people away from the work that actually delivers impact. That's where we come in.

Generative and agentic AI, used well, is one of the greatest opportunities in a generation to lift the sector's impact. With 25+ years of experience and best-in-class technology, we help mission-led organisations put it to work — returning time and money to the mission, so you can grow your ambition to match.

How we work

Four ways to work with us — a path for every budget and level of complexity.

01 • CONSULTING

We deliver for you

Expertise, amplified by AI.

Deep sector expertise delivered at a speed and precision traditional consulting can't match.

Strategy & growth — strategic planning, feasibility studies, value propositions, campaign readiness.

Insight & analytics — data & analytics, propensity modelling & forecasting, financial modelling, impact measurement, dashboards.

Governance & operations — board & executive support, policy development, procurement.

Costed to your brief.

04 • BOARD & GOVERNANCE

We help you do it responsibly

Confidence for those accountable.

The clarity and control your board and leadership need to adopt AI well.

Board AI-readiness sessions.

Governance frameworks.

AI policy development.

From \$2,000/day, scoped to your needs.

WORKING WITH

Alfred Foundation • CCV • University of Melbourne • Daylight Foundation

We build your capability

Everything begins with Claude.

Put Claude to work across your organisation — sophisticated enough to hold your knowledge so it outlives staff turnover.

Claude User Group — \$100/mo. A live monthly webinar, a community of peers, and a recording of each session.

Foundations — from \$400/mo. Personalised kickoff, quarterly check-ins, resources.

Guided Partner — \$2,000/mo. Monthly coaching and quarterly strategy.

Managed AI Service — scoped. A persistent system running your funding, impact, comms and reporting.

Start anywhere; move up as you're ready.

We run it for you

For scale and complexity.

For large, complex organisations ready to move real work onto AI. Autonomous multi-agent teams that run whole workflows on their own — always on.

Financial modelling, impact measurement, data analysis, operations and automated workflows — engineered to your organisation.

Built on the Wholegrain platform, where autonomy and scale justify the investment.

*Built once, then run as a managed service.
Individually scoped and priced.*

The technology behind us

Claude

The advanced AI assistant built by Anthropic — genuinely helpful, safe and trustworthy. It holds your organisation's knowledge, reasons through complex work, and produces high-quality funding, strategy, communications, analysis and reporting, with a person always guiding it.

Wholegrain

A platform for building autonomous, multi-agent AI systems — teams of agents that carry out whole workflows on their own. Where Claude is sophisticated and human-driven, Wholegrain adds autonomy and scale, for organisations ready to move substantial, ongoing operations onto AI.

Meet the founder

Belinda Collins

Founder, Grant Force

Over 25+ years, Belinda has raised funds and set strategy across research, philanthropy, higher education and the not-for-profit sector — living the late nights, the rejection letters and the hard-won wins alongside the organisations she serves. For the past two years she has worked at the frontier of generative and agentic AI, building the systems and know-how that now sit behind Grant Force. She founded Grant Force to give mission-led organisations what she always wished they'd had: the best expertise and the best technology, together, at a price the sector can afford.

Join the Claude User Group — \$100/month

Every month, a live webinar on using Claude for real sector work — funding, communications, reporting and more — plus a community of peers learning alongside you, and a recording of each session to watch any time.

To join, email belinda@cumulate.au or call 0413 701 037 — we'll set you up and send your first invoice.

Let's begin

Wherever you start, we're beside you as you grow.
